DETAILED ACTION

Specification

The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: The applicant should be consistent in naming element 2. See page 5, lines 22 and 24 (layers 2) and page 6, line 1

(loudspeaker 2), for example. The applicant should be consistent in naming element 40. See page 6, line 13 (loudspeaker assembly 40) and page 7, line 17 (diaphragm assembly 40), for example. Applicant has reference numerals reversed with respect to the drawings. See page 6, lines 2 and 3 and figure 2. In figure 2, the actuator fixed end is identified as item 12 and the movable end is identified as item 11 while in the specification, "One end 11...is therefore fixed" and "The opposite end 12....coupled to the diaphragm 21."

Appropriate correction is required.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: See page 7, line 8, items 64 and 65. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The present invention is directed to a loudspeaker. Independent claim 1 identifies the uniquely distinct feature of a piezoelectric actuator with each end coupled to a diaphragm where one end is fixed relative to a support in combination with all the disclosed limitations of claim 1. Independent claim 19 identifies the uniquely distinct feature of a piezoelectric actuator with each end coupled to a diaphragm where one end is coupled to the diaphragm at the edge of the diaphragm in combination with all the disclosed limitations of claim 19. The closest prior art, Longbottom (GB 2,386,026) discloses a piezoelectric actuator with each end coupled to separate diaphragms at the edge and Morikawa (JP357152800A) teaches a piezoelectric actuator coupled at both ends to a diaphragm but fails to teach an end fixed relative to a support or an end coupled to the edge of the diaphragm. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

This application is in condition for allowance except for the following formal matters:
Errors in the drawings and specification as detailed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte* Quayle, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
